

SUMMER TERM

Firstly, I just wanted to say a big well done to our Year 2 pupils during our spring term. Your hard work and dedication have paid off, and you should be proud of your accomplishments. Keep up the great work!

Maths

As Mathematicians in Year 2, we have worked very hard over this last term within our maths, so, let's keep that up! We have been counting in our 2's, 3's, 5's and 10's, which we will continue throughout the term. We will now begin to focus on 4's in preparation for Year 3. We will be continuing to focus on the 4 key operations multiplication, division, addition and subtraction. Focusing on word problems and reasoning in preparation for our SATs. In our new maths learning, we will be looking at weight, volume, and capacity. We will be continuing to consolidate all our prior learning taught in the week with an arithmetic or reasoning questions on a Friday.

English

In English, children will continue to practise spelling, grammar and handwriting. The children are just about to start their non-chronological report on a Jaguar and looking at non-fiction features.

We will now be moving on to looking at the very famous author, Julia Donaldson.

Science- As mini-Scientists, children will be exploring their new topic Everyday materials. Pupils will learn to identify and compare different material based on their properties. Pupils will develop their scientific investigative skills by carrying out

Thematic

Our thematic units are cross-curricular, covering all the traditional subjects as well as more contemporary areas of study. Our thematic topic this term is Going Wild. In which the children will get to learn about animals and make their very own PowerPoints based on animals. They will also be making their own finger puppets and creating lots of art pieces based on printing.

Our next topic after Going wild is called "Record Breaker," looking at the inspirational story of Sir Ranulph Fiennes. He is famous for his dare devil achievements and record-breaking expeditions. Pupils will learn, through his life story, all about his achievements and what he hopes to accomplish in the future.

RE- In RE we will be starting a new topic looking at questions that puzzle us. This unit uses materials from Christianity and other religious traditions to explore 'big questions' that children might want to ask, including some religious or spiritual questions. It will enable pupils to see that some big questions have no certain and agreed answers, but they are interesting and important.

PSHEe-The children this term will be looking at health and wellbeing. Focusing on what we need in order for us to look after our mental health and wellbeing.

P.E- Year 2 students will continue to develop their fundamental movement skills, such as running, jumping, hopping, skipping, throwing, and catching. They will be encouraged to practice and refine these

experiments and investigations to explore the properties and changes of materials.

skills through different games and activities.
